The “Inside Curve”, parked cars and the “Need for Speed”

- There are 4 right angle turns without stop signs on the streets of Glenmoor. Residents have suggested that in order to avoid blocking visibility and to increase public safety, we **avoid parking** on the inside, or short side, of those curves. The most concerning spot is the first turn on Redwood just after the intersection of Ivy and Redwood.
- It’s less than ½ mile from the entrance of Glenmoor to the home at the farthest point in the subdivision.
 - At our posted speed limit of 25mph, it only takes 58 sec. to drive that ½ mile.
 - For those who would make that drive at 35mph, *only 16 seconds are saved*. For those who drive at 30mph, *only 10 seconds are saved!*
 - ***Have you got 16 sec. or less to protect the safety of our residents? Please be mindful of your speed and slow down! You may save the life of a child or a beloved family pet.***
